## Course Layout

*I am going to give you a glimpse of how this course is going to help you achieve your organizational needs.*

*The foundation of the course is four pillars that will follow every project and will provide the tools I need to have a well-structured plan to implement the tailored systems.*

*These pillars are as follows:*

*Action 1: Assessment*

*Action 2: Planning*

*Action 3: Implementation*

*Action 4: Evaluation*

*Each of these actions will pertain a set of steps to follow to provide valuable results to achieve the ultimate goal of living without clutter and in a home that radiates positive energy!*

*The design of the course is for someone who needs to do a complete makeover of their house and will cover bedrooms, bathrooms, kitchen basics, recreational, living, dining, hobby room; laundry or utility room and home office.*

*The course contains six lessons, and we cover the content in twelve virtual sessions of 50 minutes each plus two virtual sessions of 15 min for checking. See the content below:*

*Lesson 1: Organizing the Bedroom(s)*
